

Why you need IT

**Dream is good but reality is better
Let us make it real**

Fact : Most of possible customers won't ask friends, family for recommendation, instead they will ask Google or Yahoo. Also they want to work with experienced professionals. Investing in basic applications such as a website is now a solid return in investment.

What you need in your Starter Pack.

Web passport

- **A Website**, your website is your entry to internet, it is a cheap full time employee.
- **A Content Management System**, Update your website and manage your intra and extra content without IT knowledge

Get professional

- **Your brochure**, The brochure is what your potential client keep when he first access your web space.
- **Private company space**, Email, shared calendar, Documents management , and basics tools needed for company start.

Crucial part of a company development goes with Information system management, a good I.S. is a key to better work. Postponing this work lead to enormous cost later (Building on top of considerable amount of data, training ...), and a decrease in work efficiency. At this critical part of the growth, data management and tasks automation become compulsory.

What you should expect from your Information System.

Functions

- **Data management and security**
 - Identifying and capturing relevant information
